

Memo

To: Miscellaneous File - 413 S. Glenstone
From: Gene Pabst ~~UX~~
Date: October 21, 1999
Subject: Report of gasoline fumes in the sanitary sewer.

On October 20, 1999 at approximately 1:45 P.M. Randy Lyman called me to tell me that he had received a voice mail from Dave Fraley, City Utilities, stating that someone from the Department of Natural Resources had talked to him and stated that there was a gasoline odor in the sanitary sewer at the Glenstone Baptist Church, 413 S. Glenstone. I immediately went to that location and checked the following manholes (see attached map):

Wye Map O-20 NE	Manhole Number	L.E.L.	Comments
	25	0%	No gasoline odor
	21	0%	No gasoline odor
	15	0%	No gasoline odor
	12	0%	Did not remove lid

After returning to the office I called Dave Fraley to tell him what I had found. Dave told me that he had talked to Richard Bates, DNR Geological Survey, and that Mr. Bates told him that two weeks ago he was outside of Glenstone Baptist Church (North of the church) and gasoline odor was so strong in the air that he was scared to light up a cigarette. He thought he saw a sewer maintenance crew working on the City sanitary sewer line at that time. I told Dave that if it was a City crew working on the sanitary sewer they would have called us immediately if there was a gasoline problem. I told Dave that we would monitor the situation and let him know if we find a problem.

413 S. Glenstone
